xperience. the ease of a pop-up with the look of a custom exhibit

Pop-ups and backwalls

Straight backwalls

The pop-up unfolds in seconds and the silicon edged graphics are then easily inserted into the grooved channel bars that clip to the edges of the structure. The graphic is perfectly stretched and fastened.

Curved backwalls

xperience. is also available in a curved shape. Set-up is the same as the straight format, but with a curve that offers more design possibilities!

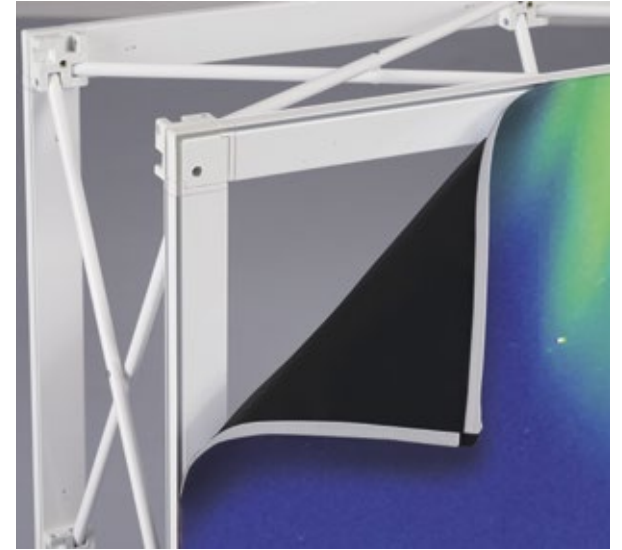

Backlit backwalls

xperience. is also available in a backlit version, with a customized pop-up structure. Very quick and easy to set-up with LED curtains that hang inside the frame. Illuminating your entire graphic from within.

6 Set-up

Pop-ups and backwalls

xperience. is a pop-up aluminum structure with an additional grooved frame that holds your silicone edge graphics in place.

The pop-up is easy to set-up: less than 10 minutes for the 3x3 xperience!

Your graphic is dye-sub printed on fabric and perfectly adjusted to the structure, providing very high-quality rendering.

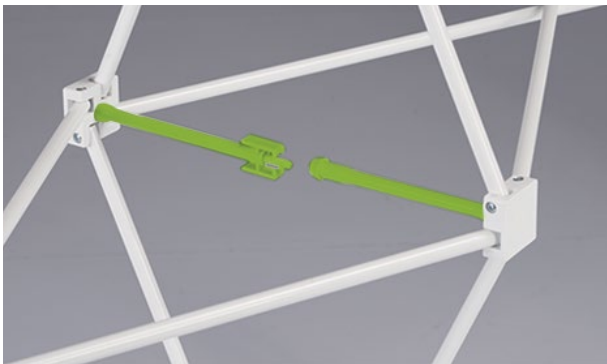

Full structure delivered in one bag

Pop-up frame

Mechanical connectors

Clip-on grooved channel bars

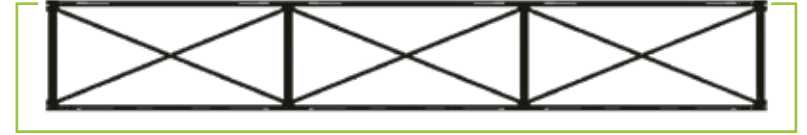

Double-groove on the same channel bar
