summary

# Choose the best display line...

## EXCEPTIONAL GRAPHIC RENDERING

The fabric/dye-sublimation combination is the most aesthetic solution that offers the best color rendering and unrivaled quality.

## EASY SETUP

Our solutions are very easy to set up and dismantle: the process is performed without tools and with a bare minimum of parts.

## LIGHTWEIGHT AND PORTABLE

Our products are transported in shipping solutions that are ergonomic and easy to handle.

## ECO-FRIENDLY

We produce repairable and reusable products using recycled and recyclable raw materials.

## LONG-LASTING

The structure may be reused for future events. The graphics are easily changed, so your communication is always up to date.

## MADE LOCALLY

Manufactured and finished by our production facilities, located in Canada, France, and Germany.

# ...and the best tools

## PS3D

Your 3D booth design software that allows you to make renderings and estimates for all our products in just a few clicks.

With the 3D Viewer extension, see your project online and share it with all collaborators thanks to a unique web link.

## XPO.CENTER

Your personalized and secure file management portal, accessible 24/7. It allows you to access your current or past orders, as well as a summary view of your order status.

With xpo.center, upload your files, then generate and approve your e-proofs in just a few clicks.

# Our expertise in dye-sublimation printing on fabric to enhance your communication

- Why choose fabric graphics?

Fabric graphics are very well-suited for use in the exhibit and events industries. They are easy to transport, handle and set up; they are scratch-resistant and wrinkle resistant.

They offer unrivaled aesthetic rendering with the best color execution that won't fade over time.

- What is dye-sublimation printing?

Sublimation is a physical phenomenon by which matter passes directly from a solid to a gas. The fabric's fibers are dyed directly, which improves color resistance over time.

- Benefits of this technology

- Unrivaled quality: dye-sub printing offers exceptional contrast, intensity and depth. Colors are vibrant and available in a wide range, including at high density.
- Anti-reflective: dye-sublimated fabric absorbs light and prevents glare from appearing on your image.
- More eco-friendly process: the inks used are aqueous solutions that are solvent-free and odorless.

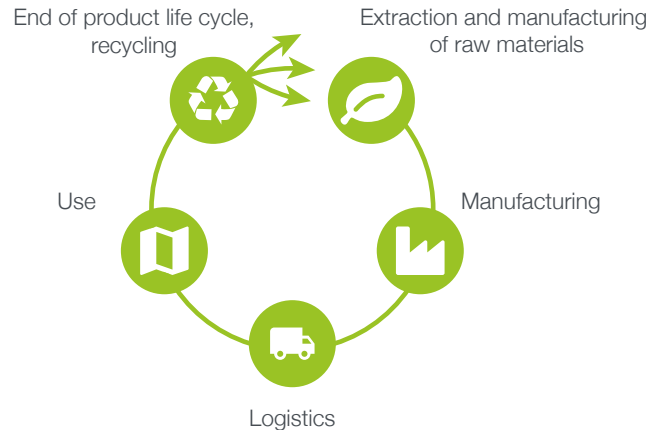

# Our environmental approach guarantees you the most eco-friendly products

Throughout the entire life cycle of our products, we implement concrete actions with our network to minimize environmental impact.

Our eco-responsible approach takes the form of five commitments that are carried out throughout the entire life cycle of our products:

- 1 Opt to use recyclable, recycled, biodegradable or repairable raw materials and finished products whenever possible. Ensure that only the essential elements for desired features are used, i.e. no unnecessary parts.
- 2 Minimize the impact of manufacturing on the environment by using more eco-friendly machinery and optimizing the production process. Notably, our 1158 solar panels (2252 square meters) installed on the rooftop of our factory in France allow us produce 313 MW per year (for lower consumption: 301).
- 3 Reduce environmental impact with local production and distribution facilities. We produce and store in strategic, centralized locations ( 3 production facilities worldwide: Canada - France - Germany ; and logistics centers close to major cities)
- 4 Encourage the reuse of our solutions. All of our frames can be used for several events.
- 5 Oversee the recycling of raw materials and final products, or the transformation of non-recycled graphics into objects. For example, aluminum is systematically recycled, and we have created partnerships with local charitable associations to reuse graphics as textiles.

An environmental approach implemented throughout the entire life cycle of our products

Reuse of a booth graphic as a decorative wall frame

in Canada and across Europe, to limit the environmental impact of transport. Overall, we strive to integrate eco-friendly actions into our day-to-day activities and at every level.

# New products

## one.

3 new sizes (see page 36)

one.R1 23"

one.R1 39"

one.R1 47"

All graphic finishes now available:

Dye-sub printed fabric graphics with a wide range of finishes for a variety of applications (Raw cut, sleeve...). (see page 54)

Panoramic lightbox, the “à la carte” lightbox solution:

Go one step further in customizing your lightboxes: accessories (TV, shelves), new profile colors, new opaque back graphic. (see page 49)

## contour.

Stand out from the crowd with new contour inclined, curved and wave formats. (see page 13)

- Easy-to-transport visual solutions that are resistant, durable and easy to set up
- Pop-ups, fabric frames, all-in-one portable kits

# pop-ups & backwalls

# Choose a pop-up or backwall solution according to your needs and preferences

## contour.

slim, changeable design

Tubular system with stretch single-sided or double-sided pillowcase graphic for those looking for a truly portable, modular and changeable exhibit solution with optional accessories. Setup time: 10 minutes.

**best seller**

## xtension.squared

perfect angles

The very lightweight popup display with ultra-easy setup. Its right angles provide perfect rendering. Available in 5', 8', 10' and 2x2, 3x2. Setup time: 60 seconds.

**best seller**

## xpressions.

3D effect

An ultra-lightweight popup display with several textile graphics to let you easily update your message. Also available as part of an all-in-one kit with a hello.xpress case. Setup time: 30 seconds

**best seller**

## xperience.

modular exhibit finish (silicone edge)

Pop-up structure with channel bars in which silicone edged graphics are installed for a perfect finish. Available in the following versions: straight (including very large formats), curved, backlit and counter. Accessory-compatible (TV, lights, shelves, etc.) Setup time: 10 minutes.

## virage.

curved

The fabric pop-up display with a curved design. Available in 8' and 10'. Setup time: 60 seconds.

Quantity pricing applied to multiple graphics of the same file: **5%** for 6-24 units and **10%** for 25-50 units.

# xtension.squared, the perfectly squared fabric pop-up

The perfect solution for your events!

Create a modular 20 foot exhibit using one 10' (4x3) xtension.squared frame and two 5' (2x3)!

## xtension.squared

The modular 20' exhibit:  
Two 5' (2x3) frames with graphics + one 10' (4x3) frame with graphic + 1 large convertible case with podium top and graphic

---

# xperience, the ease of a pop-up with the look of a custom exhibit!

- The silicone edge fabric graphic (SEG) slips into the channel bars for a perfectly taut graphic with guaranteed graphic impact
- The frame unfolds in seconds, the bars attach to the hubs, and the graphic is inserted into the groove
- Compact solution: transport it in a carried or wheeled bag
- The xperience bonus: multiple options available, including large format, curved, backlit and counter versions
- Accessories: TV, LED light. Frames may be connected to one another

# xperience: straight formats
